

- No more build up of bacteria causing mold and mildew.

- Following the Glidecoat Home application, the granite has a long lasting barrier to water and stains.

GLIDECOAT HOME

Whether it's that water spotted shower glass, or granite counters than need sealing, floor tile that can stain, metal table or stainless steel that you don't want to see pitted or rusted. Glidecoat Home is the ideal product. To list every surface Glidecoat can be applied to would be a list most people would never read given its length. Our clients have covered most surfaces you can think of from glass, wood, fiberglass, painted surfaces, metal to name a few. They have used it to coat their camera lenses, diving masks, shower stalls, chrome or stainless steel taps, kitchen counters to name just a few.

Why Glidecoat? Glidecoat is a nano coating that was first developed by NASA nearly 20 years ago. Since then nano coatings have spread throughout various industries from automobiles, to electronics. A known use today is making your iPhone 7 waterproof.

What does Nano mean. It refers to the size of the molecules or particles in the coating itself. These particles range from 80-100 nano-meters. Doesn't mean a lot to most people but to put it to scale there are 25 million nano-meters in an inch. Given the size of the particles when applied to a surface they seal all the pores making the surface hydrophobic, but also resistant to UV, scratches, chemicals, extreme heat and even anti-graffiti. With that water, oils, minerals, bead off without penetrating the surface and with that beading easy to clean up or wipe off.

By using Glidecoat in your home you can protect countless surfaces from damaging contaminants.

COMMON USES

Glass Shower Enclosures

Glidecoat is a product that will help your shower doors and glass panels look like new. No more wiping down the glass after showering or using a squeegee. Shower glass allows hard water spots including mineral build up due to its porous nature. In addition there is a constant build up of bacteria causing mold and mildew. With Glidecoat Glass the surface of the glass is no longer porous and becomes hydrophobic, so water, minerals, etc. simply bead off the surface. Furthermore it provides a bacteria free surface.

Once applied the shower glass is very easy to clean, no longer requires harsh detergents and repels both water and oils. Best of all though it does not require the need for drying the glass after each shower.

Granite/Marble Counters

Glidecoat will completely seal marble, granite, onyx, limestone, quartzite and other polished counter surfaces that need to be protected from stains. Glidecoat provides a long lasting barrier to water and stains.

Appliances

Glidecoat is heat resistant and can be used on stainless steel and glass ovens making the cleaning easier using only water and a mild detergent.
